## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 – 19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the cited prior art neither teach nor fairly suggest a process for screening an array of materials comprising:

- a. containing the array of materials within a cell and in alignment with a window in the cell;
- b. contacting the array of materials with a feed fluid while sequentially selectively heating each of the materials in the array by impinging radiation that is passed through the window onto the selected material to form an effluent corresponding to the heated material;
- c. separating each effluent, by flowing each effluent sequentially through a semipermeable membrane to form sequential sample streams; and
- d. detecting at least one component of the sequential sample streams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional cited prior art teach related analysis methods.
